

Vibration Table

The Vibration Table is an accurate and affordable solution for calculating the damage caused by repetitive movement caused to materials/ boxes during transportation.

The durability of the packaging must be checked beforehand so as to provide the best quality to clients. Hence, the Vibration Table becomes utmost necessary to test whether or not boxes can resist extreme pressure and vibration during transportation.

Specifications:

- Maximum Load Capacity: 100 Kg
- Display: LED (Digital)
- Table Size: 800 x 800 mm
- Amplitude: 25.4 mm
- Power: 220V, Single Phase, 50 Hz
- Frequency: 2Hz to 6Hz
- Angle in Swivel Model: 0°, 30°, 60°, 90°
- Timer: Up to 99.9 min or 99.9 hrs

Features:

- Highly accurate test results under various frequency settings
- Digital Timer for setting test run time
- Sample Slippage protection by rail on all sides
- Strong base plate with rugged structure
- Adjustable Frequency
- Feather Touch Controls

Application:

- Pollution Control & Power Generation
- Cement & Aggregate
- Food
- Chemical
- Customized sizes also provided on specific requests
