

Ink abrasion Rub Tester

The ink abrasion rub tester is one of the most highly used instruments in the packaging industry. It has an immense application and is used to calculate the resistance against scuffing and rubbing. This instrument can be efficiently used to test the quality of labels and packaging materials. The instrument has a silent operation and performs the Rub test with the help of uniform load distribution. This instrument can be further used to check smudging during transportation and warehousing of packaging materials. Ink abrasion tester adheres to all industry standards. The instrument is an easy to use machine and proves to be very helpful in the packaging sector.

MODEL NO. TX-AB 100

Digital Preset Counter

VFD Drive

FEATURES

- Stainless steel powder coated rugged structure
- Dual Test load operation
- Gear motor for easy arm rotation
- Accurate data and results
- Dimensions- 300x 470 x 428mm

SPECIFICATION

- Equipped with sensor
- Digital screen with 9999 digits
- Rub speed – 43 cycle/min
- Accuracy – 2 cycle/min
- Rub mode feature
- Rub pressure – 2lbs and 4 lbs
- Power – 220V AC, 50H
