

# **Environmental Test chamber/ Thermal Shock Chamber**

Environmental Test chamber/ Thermal Shock Chamber is a unique instrument & most frequently used testing machines. It has applications in various segments and usage varies from material to material. Once a sample is placed inside the chamber the reaction and changes in the sample properties are observed before and after the test.

## **MODEL NO. TX ETC PTH 100**

## **FEATURES**

- Temperature required: -10 to 180 C (-20,-40,-60 & -80 also available on Request)
- · Size: 200 Litres
- Timer: A timer would be provided upto 999 hours for auto cut off
- Safety features would be incorporated to ensure that the temperature does not rise beyond 180 Deg C.
- Touch screen HMI Based Display of parameters with data logging available.
- Compact size with castor wheels to move the chamber in the laboratory.

## **Features of Touch screen controller:**

- Microprocessor based model with auto tuning feature
- Run time vs temperature graph on screen
- Data recording with temperature data reading
- USB and pen drive option available to extra data easily
- Option available to set PV and SV value
- Knox system integrated for data security
- User settings can be locked by admin panel protected by password
- User can control PID settings through Advanced setting In built Alarm system

## **SPECIFICATION**

Capacity	200 litres
Display	Touch Screen HMI based
Accuracy	Temp. ± 3°C/Humidity ± 5%
Least Count/Resolution Temp	0.1°C / 1%
Temperature Range	-10°C to 180°C (Up to -70 degrees on request)
Humidity Range	20% to 95%RH
Timer	999Hr

# **Additional Specifications:**

No. of Sample racks	2
Handle	Yes
Wet Heater	1 Kw, 1 no.
Temperature Sensor	1 (PT-100)
Movement	Castor Wheels
Material	Mild Steel (Outer Body) Stainless Steel(Inner Body
Finish	Powder coated Havel Gray & white combination finish and bright chrome/zinc plating for corrosion resistant finish
