

Motorised Inclined Plane

The Motorised Inclined Plane is designed to test the stability of appliances and equipment under various tilt conditions. It helps evaluate the risk of toppling when devices are placed on a slope, ensuring compliance with stability and safety norms for household and commercial appliances.

Model No. : HAP8

Product Features

- Controlled tilting for stability verification tests
- Smooth, motorized adjustment with digital readout
- Ideal for evaluating TVs, ovens, kitchen appliances, etc.
- Rigid construction with anti-slip surface
- Compliant with BIS and IEC safety testing requirements

Technical Specification

Parameter	Specification
Tilt Angle Range	0° to 30° (adjustable)
Platform Size	Customizable as per appliance size
Tilt Control	Motorised with digital angle indicator
Material	Mild steel frame with powder coating
Drive Mechanism	Gear motor with variable speed
Angle Accuracy	±1°
